This document presents the overall Data Group structure of the messages supported for NCTS-P6. The Data Groups are shown in a hierarchical format, where lower level data groups are indented with hyphens. The MESSAGE Data Group is the only Data Group at the top level and it is the only Data Group that appears without a hyphen in front of it since it comprises all other Data Groups in a message. The three-letter code is used to uniquely identify a data group.

The content of this file is extracted from the CSE database (CSE-60.4.16).
